SUMMARY

Backend Engineer specializing in scalable microservices, real-time data pipelines, and intelligent system design. Proven ability to bridge traditional Java/Spring Boot architectures with modern AI workflows, focusing on high-performance, production-grade applications.

TECHNICAL SKILLS

Languages & Databases: Java, Python, SQL, MySQL, PostgreSQL, MongoDB, Redis
Backend & Architecture: Spring Boot, Microservices, REST APIs, Kafka, Multithreading, Resilience4j
AI & Data Systems: RAG, Vector Databases (FAISS, Chroma, Pinecone), Pandas, Apache Spark
Cloud & Observability: AWS, Docker, Kubernetes, CI/CD, Prometheus, Grafana
Tools: JUnit, Mockito, Postman

EXPERIENCE

Software Engineering Intern (Backend & Networking) | Shri Software Technologies | Nov 2023 – July 2024

- Developed and optimized REST APIs using Spring Boot within a distributed microservices architecture.
- Conducted system performance monitoring, packet analysis, and system-level debugging using Wireshark.

AI/ML Intern | YBI Foundation | Feb 2024 – Mar 2024

- Engineered automated data workflows and feature extraction pipelines for machine learning models.
- Performed comprehensive data preprocessing and statistical analysis using Python

KEY PROJECTS

Real-Time Payment Processing System

Designed a highly scalable backend with idempotency and retry mechanisms. Integrated Kafka for robust, asynchronous transaction handling.

Distributed Rate Limiter

Engineered a fault-tolerant rate-limiting service using Redis and the token bucket algorithm to protect API endpoints from abuse.

Knowledge-Based Search Assistant

Built a contextual similarity search engine over large document datasets utilizing Vector Databases and RAG architecture.

IoT-Based Firer Detection System

Developed an end-to-end data processing pipeline connecting ESP32 hardware sensors to a centralized Python backend.

EDUCATION

B.E. in Artificial Intelligence and Data Science (Pursuing)
Marathawada Mitra Mandal's College of Engineering, Pune | Aug 2024 – Present
